

EDTA ZINC 9%

For Prevention or Correction of Zinc Deficiency in Most Crops

GUARANTEED ANALYSIS

Zinc (Zn)9.0% As Chelated Zinc
Zinc Derived From Zinc Ethylenediaminetetraacetic Acid (Zn EDTA)
Pounds of Zinc (Chelated) per Gallon1.0 lb

Net Weight:

Totes..... 2,950 lbs (275 Gallons)

Jugs..... 54 lbs/case (2X2.5 Gallon case)

General Information

EDTA Zinc 9% Micronutrient contains 1 pound of fully chelated zinc per gallon in a form readily available to plants. It can be effectively used as an additive to dry or liquid fertilizer in irrigation systems or as a foliar spray. EDTA Zinc 9% is also compatible with most herbicides, insecticides and agricultural chemicals that may be utilized in combination with liquid fertilizer. EDTA Zinc 9% is NOT compatible with CAN-17 or N-PHURIC®.

EDTA Zinc 9% is most effective when placed in the root zone during planting or moved into the soil by irrigation, tillage or rainfall. It is important that the Zinc deficiency be treated before visual symptoms appear to insure proper yields. Rates of application will vary depending upon the severity of the deficiency, climate and soil conditions, and method of application. Consult your State Agricultural Experiment Station or Extension specialists for advice in selecting treatments from this label to best fit local conditions.

CAUTION: Harmful if swallowed. Avoid contact with Eyes, skin, and clothing. Avoid breathing spray mist. READ LABEL-----FOLLOW DIRECTIONS! Refer to SDS for health, safety, and environmental information. KEEP OUT OF REACH OF CHILDREN

Soil Applications: EDTA Zinc 9% can be applied alone or in combination with dry or liquid fertilizer for pre-plant, starter or side dress applications. For most effective treatment of row crops, make soil applications in a band at planting time or as a side dressing shortly after planting.
Foliar Applications: EDTA Zinc 9% when diluted with water according to label recommendations, can be applied as a foliar spray. To ensure even distribution on leaf surface, and increased effectiveness of foliar application, a small amount of wetting agent or detergent may be added. Aerial applications can be made at concentration of 1 quart per 5-10 gallons of water.

Field and vegetable crops including corn, rice, potatoes, beans, cotton, tomatoes, etc.

Soil Applications: Apply 1-8 quarts of EDTA Zinc 9% per acre in liquid starter fertilizer. Rate will depend on extent of the Zinc deficiency and soil conditions.

Foliar Applications: Apply 1-2 quarts of EDTA Zinc 9% per acre in 20-100 gallons of water and spray to thoroughly cover foliage 10 days to 2 weeks prior to bloom. Follow with a 2nd application in two weeks if required.

This product may be corrosive to aluminum, mild steel and brass. Store in HDPE, fiberglass or stainless steel containers. Use only stainless steel, PVC or polypropylene fittings. Store in cool place in original container in a locked storage area inaccessible to children.

Do not reuse containers, Triple rinse then offer for recycling Disposal by procedures approved by state or local authorities.
